

# Mind Body Symptoms: FSS Explained

## *Project ECHO community of practice*

We welcome GPs, nurses, community allied health, school-based health and wellbeing professionals, Emergency Department and other hospital-based providers to participate in this community of practice led by:

**Phoebe Cooper** – Psychologist, Consultation Liaison CYMHS, CHQ

**Sue Wilson** – Child & Adolescent Psychiatrist, Consultation Liaison CYMHS, CHQ

**Anita Cohn** – General Paediatrician, CHQ

**Occupational Therapy/Physiotherapy** representative, CHQ

**Mission:** To grow a community of practice for clinicians who want to learn more about supporting the recovery of young people with functional somatic symptoms.

**2<sup>nd</sup> Thursday of the month, 1-2pm**

**9<sup>th</sup> February-14<sup>th</sup> September 2023**

All you need is an internet connection, webcam and a preparedness to contribute ideas and support your colleagues.

Sessions include a case or scenario discussion, and brief presentation on topics including:

- Understanding functional somatic symptoms
- Making the diagnosis
- Communicating the diagnosis to the young person and family
- Setting treatment goals
- Resources for education
